**DETAILED ACTION**

1. This office action is in response to the amendment filed on 05/15/07.

***Allowable Subject Matter***

2. Claims 98, 100, 102, 104, 106, 108 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

Claims 99, 101, 103, 105, 107 and 109 have been cancelled and claims 98, 100, 102, 104, 106, 108 have been amended. Upon further consideration and comparison with prior art of record (closest reference, Nakamura et al. – US 5,168,509), the examiner agrees with applicant's argument in the REMARKS filed on 05/15/07. Particularly, prior art of record, taken individually or collectively, fails to fairly teach apparatus and method for transmitting and/or receiving an n-level PSK modulated signal and an n-level QAM modulated signal, wherein the transmission power of the n-level PSK modulated signal or the n-level QAM modulated signal is determined according to or relative to the information representing the selected value of n, as claimed in all independent claims. Thus, claims 98, 100, 102, 104, 106, 108 are found to be novel and unobvious over prior art of record.
